Attenuators

- High Frequency Attenuators
- High Precision Attenuators
- Thermo Variable Attenuators

SSM SUSUMU
Thin Film Specialist and Innovator

Capacitors

- High-Voltage Capacitors
- High temperature
- Non-magnetic

SRT
MICROCÉRAMIQUE

JFETs

- Amplifiers
- Chopper
- Regulators
- Switches

InterFET

Relays & Switches

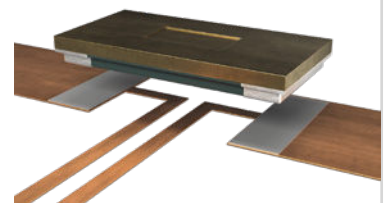

- High Reliability
- High-Voltage
- Low Thermal EMF
- Radio Frequency (RF)

OTO
Technology

Resistors

- Current Sensing Resistors
- High Temperature Resistors
- Network / Voltage Dividers
- Non-Magnetic Resistors
- Power Resistors
- Precision / Ultra-Precision Resistors
- Standard Resistors
- Thermosensitive Resistors

EXXELIA OHMCRAFT

**GENERAL
RESISTANCE**

ISABELLENHÜTTE
Innovation by Tradition

SSM SUSUMU
Thin Film Specialist and Innovator

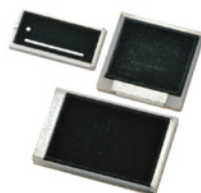

AAAA

Resistor Technology

VPG Foil Resistors
VFR - ALPHA ELEC - POWERTRON - APR

Terminators & Power Splitters

- High power performance
- Wide frequency range
- Small size

SSM SUSUMU
Thin Film Specialist and Innovator

Customised Components and Sensors

Providing a vast array of electronic components, sensors and connectors for all types of applications and industries

[Find out more](#)

Sensors

Magnetic Sensors

- Tunneling Magnetoresistance (TMR)
- Giant Magnetoresistance (GMR)
- Smart Sensor

Load Cells

- Canister Load Cells
- Clevis Pin Load Cells
- Low profile design
- Rod End Load Cells
- Subminiature design
- Miniature version

Pressure Sensors

- High temperatures
- Harsh environment
- Wireless
- PCB Mountable

Temperature Sensors

- Thermocouples
- RTDs
- Thermistors
- Semiconductor-based sensors
- Temperature sensors and probes

Environmental Measurement Sensor

- Absolute Pressure
- Air Temperature
- Volatile Organic Compounds (VOCs)
- Absolute & Relative Humidity
- Dew Point Temperature
- Shock load and duration

Current & Voltage Measurement

We offer a full range of modular data acquisition modules brought to us by Isabellenhütte.

- Current & Voltage Measurement

Enclosures

Fibox is a global leader in sustainable enclosure solutions, offering high-performance electrical housings made from polycarbonate, ABS, and die-cast aluminium. Since 1966, Fibox has combined Nordic environmental values with innovative design. Its durable, recyclable enclosures serve industries such as energy, mobility, and communications.

Our parent company, Rhopoint Components Ltd, was established in 1975 with the aim of supporting design engineers in the design of electronic solutions and product development through a range of precision components and sensors in the UK market.

Rhopoint Components GmbH, our subsidiary with a distribution centre in Gaukönigshofen, Germany, will strengthen this product and service offering in Europe.

In order to offer you the most efficient service possible and fast delivery times, we keep many products in stock on site and have our own experienced team on hand to provide you with advice and assistance.

Rhopoint Components Ltd is an authorised partner for over 25 industry-leading manufacturers from around the world offering an extensive range of stocked lines and fully customised solutions to meet your requirements.

We have offices based in the UK and Europe dedicated to providing localised support.

From the depths of the earth to outer space:
We supply specialised sensors and components
that are suitable for the most extreme environments

Resistors | Pressure Sensors | Temperature Sensors

**All product categories also available with approval
for the aerospace or automotive industry**

Customised options available for most products

Technical support from experienced engineers

**Find the latest information on electronic components and
sensor technology on our website www.rhopointcomponents.de**
